

FROM |  pa health
& wellness.

Thank you for your participation in the Allwell from PA Health & Wellness network. We appreciate your partnership as we achieve our shared goal of delivering quality, accessible, and affordable healthcare to our members.

We routinely look for ways to improve our operations and create efficiencies that align to industry best practices and make it easier for providers to do business with us. To that end, we are reaching out to share an exciting new way to easily submit Medicare Part D vaccine claims to us: TransactRx.

TransactRx is a web-based claims clearinghouse platform that makes it simple to submit these vaccine claims and quickly receive reimbursement. It allows providers to easily bill Medicare, Medicaid and health plans like Allwell from PA Health & Wellness – and it is capable of processing both benefit and standard professional medical claims. Built-in coding and billing rules allow providers to submit accurately coded claims without any special training. It can also help providers quickly determine important billing factors such as:

- Whether a patient has Medicare Part D coverage
- Which Part D plan to bill
- The patient's financial responsibility for a specific vaccine
- Reimbursement amount

After submitting a claim via TransactRx, providers can verify acceptance of the claim, check the status of payment, and view reports to track and manage claims and payments.

Provider enrollment with TransactRx is **free** and simple and can be completed online https://portal.mytransactrx.com/ws_enroll/. Enrollment typically takes 48 hours or less. Once the enrollment process is complete, you can start submitting Medicare Part D claims for vaccines to Allwell from PA Health & Wellness via its platform.

We believe this new tool will be highly beneficial, and look forward to continuing to improve our business operations with you. As always, please contact our Provider Services team with any questions you may have at HMO: 1-855-766-1456, HMO SNP: 1-866-330-9368, TTY: 711.

Sincerely,

Allwell from PA Health & Wellness
