

Termination of Somatus Care Management Program for Patients with CKD/ESRD

June 1, 2023

Effective July 1, 2023, we will no longer partner with **Somatus Inc.**, which provides care management services for members with chronic kidney disease (CKD) and end-stage renal disease (ESRD). Some of your patients may be affected by this change.

Consequently, some of your patients may be enrolled in our internal care management program, the Centene CKD Center of Excellence. This program will continue supporting care management needs for members with CKD and ESRD.

If you have any questions, please do not hesitate to contact your provider representative.
