I. Call to Order	Greg Hershberger called the meeting to order at 1:08 PM	N/A	N/A	Greg Hershberger
II. Announcements +	Roll call was conducted.	N/A	N/A	Greg Hershberger
III. Review/Approval of the Minutes	Greg Hershberger discussed that minutes are posted on our website and reviewed.	N/A	N/A	All
IV. New Business + A. MD Update B. Health Education	Presented by Dr. Craig Butler. <u>Skin Cancer Prevention</u> The world's most common cancer is a relentless disease that strikes one in five people by age 70. • Skin cancer is the cancer you can see. ▪ Unlike cancers that develop inside the body, skin cancers form on the outside and are usually visible. That's why skin exams, both at home and with a dermatologist, are especially vital. • Early detection saves lives. ▪ Learning what to look for on your own skin gives you the power to detect cancer early when it's easiest to cure, before it can become dangerous, disfiguring or deadly. Wear SPF, seek shade, avoid tanning beds and sunbathing activities. <u>Managing Diabetes</u>	N/A	N/A

Agenda Item	Discussion	Decision (Approved or Denied)	Follow-up Action Needed (Date)	Responsible Party
	<u>1.2M Americans are diagnosed each year</u> <u>11.6% of Americans had diabetes in 2023</u> <u>97.6M American adults are living with prediabetes</u> <u>Key strategies:</u> • <u>Balanced diet</u> • <u>Engaging in regular physical activity</u> • <u>Taking prescribed medications</u> • <u>Managing stress</u> Limit sugary soft drinks, refined carbs, and processed foods. Daily blood sugar monitoring. Know your A1C. <u>Stress Awareness</u> 1. Avoid This involves identifying and eliminating stressors that you can control. This could include avoiding negative people, stressful situations, or even certain topics of conversation. 2. Alter This involves making changes to alter the stressor. This could involve communicating your boundaries, renegotiating deadlines or finding ways to compromise. 3. Accept This involves acknowledging and accepting situations that you cannot change. This could involve seeking support, practicing mindfulness or finding new ways to cope with stress. 4. Adapt This involves adjusting your perspective, expectations, and attitude towards the stressor. This could involve changing

B. Covid-19/Fluvention	how you perceive a situation, practicing gratitude, or setting realistic goals. Exercise, activity, and better sleep can be helpful with stress management. <u>Fatigue Management</u> • Balancing activity with rest • Prioritizing tasks • Maintaining a healthy lifestyle ▪ Proper nutrition ▪ Sleep hygiene Check with Dr. to make sure there are no underlying conditions causing chronic fatigue. Let us know of any topics you would like to have covered.	N/A	N/A	
	Presented by Susan Foster. Fluvention® is an annual program by PA Health & Wellness designed to promote vaccinations as the key to flu prevention. By increasing annual influenza vaccination rates in high-risk members, health related complications and excess healthcare costs are greatly reduced. Educational materials are shared with our participants and healthcare providers by things such as email, general mail, text messaging, and phone messaging. This program targets high-risk groups, which include:

	• People who are 65+ years • People with chronic health conditions (COPD, Diabetes, heart disease, etc.) • Women who are pregnant The flu virus changes every year. Getting a yearly vaccine helps protect yourself and those around you. Plus, it's available at no cost to you. Sometimes you can feel “sick” after getting a flu vaccine because your immune system reacts to the vaccine and makes you seem tired and worn down. Or maybe you were already exposed to the virus before getting the vaccine. The vaccine is not a live virus, but it can stimulate your immune system to create a response thinking it has the flu. <u>Key Flu Points</u> • Influenza (flu) is a contagious respiratory illness caused by flu viruses that infect the nose, throat, and lungs • There are two main types of flu viruses: Influenza A and Influenza B. These are the types of flu that are responsible for seasonal flu epidemics each year and determine how flu vaccines are made • Flu can cause mild to severe illness, including death • Flu viruses are spread mainly by tiny water drops made when people with flu cough, sneeze, or talk • The best way to prevent getting the flu is by getting a flu vaccine each year, as well as good personal hygiene, like hand washing. What happens when you are infected with a Respiratory Virus?			

Participant Advisory Committee

Agenda Item	Discussion	Decision (Approved or Denied)	Follow-up Action Needed (Date)	Responsible Party
	The incubation period is the time when you are exposed to the flu virus to when you start showing symptoms. You might get sick one to five days after being exposed, however, for most people symptoms start within 48 hours of exposure. The infectious period is the time when you can spread the flu virus to others. People who have the flu but have no symptoms can still spread it. Flu, COVID, and RSV Activity as of January 30, 2026 • The amount of acute respiratory illnesses causing people to seek health care in Pennsylvania is now at a minimal level. • Seasonal (Acute) respiratory illness activity is at a minimal level indicative of the end of flu season for 2025-2026. • COVID-19 activity is also decreasing and at a minimal level. <u>Most Common Infectious Diseases in the U.S.</u> Respiratory Infections, Sexually Transmitted Infections, Foodborne Illness, Skin and other infections, Tick-borne illnesses, High-Risk Infections. <u>How do you prevent the spread of viruses/bacteria?</u> • Talk to your healthcare provider about your risks related to infectious diseases. • Ask your provider what vaccines are best for YOU! Not every person needs the same vaccinations. Being vaccinated not only helps protect you, but it also helps protect those around you. • Always practice good health hygiene: hand washing, covering coughs and sneezes, stay home when

and clinical	Q2 ITM data was Submitted August 27, 2025. We received IPROs assessment of the annual MY2024 PIP Submissions - Both the Clinical and Non-Clinical PIPs were accepted without the need for revisions. Year two Interim Report for MY2025 data was Submitted February 25, 2026. - Submitted Q3 and Q4 ITM data for MY2025. - Overall ITM performance showed improvement in MY2025. - PHW continues to collect data quarterly for each PIP project. - Next submission will be the Annual MY2025 Report is August 27, 2026. We are waiting to receive IPROs assessment of the Interim Report. Non-Clinical Intervention Performance: - Overall PHW maintained performance in most ITMs with some slight drops and increases. - ITM 1A significantly affects by limited notification of discharge for some individuals in the NHT process. - This can be seen in the difference between performance of ITM 3B as opposed to 1A. Clinical Intervention Performance: - PHW observed improvement among the Clinical ITMs.			

Participant Advisory Committee

June 17, 2026

Agenda Item	Discussion	Decision (Approved or Denied)	Follow-up Action Needed (Date)	Responsible Party
	▪ Clinical discharge numbers are substantially higher than NHT discharges. The data is less subject to skewing and extremes. • PHW witnesses the same problem with the clinical PIP. Many individuals discharge without notification. ▪ In the most recent NCQA audit. In circumstances where we can assess an individual, we are almost always compliant. • PHW Update to the Value Based Performance (VBP) Intervention. ▪ We have reworked the VBP to work with a new program called the Care Insights program. ▪ This program is established through selected personal assistance service providers who utilize this program ask regular questions about the participant's health and status. ▪ The answers to these questions can trigger an alert to our service coordinators allowing us to make prompt outreach to the PTP to address arising concerns. February Interim Submission <u>Successes:</u> Nearly universal improvement across intervention tracking measures noted. Several indicators demonstrated substantial gains over the course of the year, reflecting the effectiveness of targeted interventions and strengthened operational processes <u>Opportunities:</u>
