Policy/Criteria

- **I.** It is the policy of PA Health & Wellness that special wheelchair seating cushions are **medically necessary** for the following indications:
 - A. A general use seat cushion (E2601, E2602) and a general use wheelchair back cushion (E2611-E2612) for an approved manual wheelchair or power wheelchair with a sling or solid seat or back.
 - B. A skin-protection seat cushion (E2603, E2604, E2622, E2623) with both of the following:
 - 1. The member has an approved manual wheelchair or power wheelchair with a sling/solid seat/back; and
 - 2. The member has either of the following:
 - a. Current pressure ulcer or past history of a pressure ulcer (see "ICD-10-CM Diagnosis Codes That Support Medical Necessity" section below) on the area of contact with the seating surface; or
 - b. Absent or impaired sensation in the area of contact with the seating surface or inability to carry out a functional weight shift due to one of the following diagnoses: spinal cord injury resulting in quadriplegia or paraplegia, other spinal cord disease, multiple sclerosis, other demyelinating disease, cerebral palsy, anterior horn cell diseases including amyotrophic lateral sclerosis, post-polio paralysis, traumatic brain injury resulting in quadriplegia, spina bifida, childhood cerebral degeneration, Alzheimer's disease, Parkinson's disease, muscular dystrophy, hemiplegia, Huntington's chorea, idiopathic torsion dystonia, athetoid cerebral palsy, arthrogryposis, osteogenesis imperfecta, spinocerebellar disease or transverse myelitis (see "ICD-10-CM Diagnosis Codes That Support Medical Necessity" section below).
 - C. A positioning seat cushion (E2605, E2606), positioning back cushion (E2613-E2616, E2620, E2621), and positioning accessory (E0953, E0955-E0957, E0960) with both of the following:
 - 1. The member has an approved manual wheelchair or power wheelchair with a sling/solid seat/back; and
 - 2. The member has significant postural asymmetries that are due to one of the diagnoses listed in the skin-protection seat cushion criterion 2b above or to one of the following diagnoses: monoplegia of the lower limb due to stroke, traumatic brain injury or other etiology, spinocerebellar disease, above knee leg amputation, osteogenesis imperfecta, or transverse myelitis (see "ICD-10-CM Diagnosis Codes That Support Medical Necessity" section below).
 - D. A headrest (E0955) when the member has an approved manual tilt-in-space, manual semi or fully reclining back on a manual wheelchair, a manual fully reclining back on a power wheelchair, or power tilt and/or recline power seating system.

CLINICAL POLICY Wheelchair Seating

- E. A combination skin-protection and positioning seat cushion (E2607, E2608, E2624, E2625) for a member who meets the criteria for both a skin-protection seat cushion and a positioning seat cushion.
- F. A custom fabricated seat cushion (E2609) if criteria (1) and (3) below are met. A custom fabricated back cushion (E2617) if criteria (2) and (3) below are met:
 - 1. The member meets all of the criteria for a prefabricated skin-protection seat cushion or positioning seat cushion;
 - 2. The member meets all of the criteria for a prefabricated positioning back cushion;
 - 3. There is a comprehensive, written evaluation by a licensed/certified medical professional, such as a physical therapist (PT) or occupational therapist (OT), which clearly explains why a prefabricated seating system is not sufficient to meet the member's seating and positioning needs. The PT or OT must have no financial relationship with the supplier.
- **II.** It is the policy of PA Health & Wellness that special wheelchair cushions and accessories are **not medically necessary** for the following indications:
 - A. A general use seat cushion (E2601, E2602) if the member has a power-operated vehicle (POV) or a power wheelchair with a captain's chair seat.
 - B. A separate seat, back cushion, headrest, and/or other positioning accessories if the member has a POV or power wheelchair with a captain's chair seat. Power wheelchair bases that do not include a captain's chair model are: K0839, K0840, K0843, K0860-, K0864, K0890, K0891.
 - C. A seat or back cushion that is provided for use with a transport chair (E1037, E1038).
 - D. Powered seat cushion (E2610) for any indication as effectiveness has not been established.

Background

Careful consideration should be given to anticipated or potential changes in the person's function or psychosocial role changes. For instance, when working with an individual with a progressive disease process such as a multiple sclerosis (MS) or amyotrophic lateral sclerosis (ALS), the wheelchair must meet current and potential needs as the disease progresses. Likewise, a child or adolescent certainly may have growth or other anthropomorphic changes. This should be taken into consideration when ordering a new chair or related equipment.³

The evaluating provider should ascertain the individual's level of bowel and bladder control. Certain types of cushions are better suited for patients who are frequently incontinent. During the examination, the evaluating provider should question the patient about any past skin breakdown. Once a patient has had a decubitus ulcer, his or her skin is at best 80% the strength that it was prior to the ulcer.³ Such a patient will be more susceptible to skin breakdown in the future, and use of a previous seating system that induced or contributed to the skin breakdown should be avoided.

The evaluating provider needs to record the method and frequency of achieving pressure relief in order to prescribe a system that does not unknowingly remove a part of the wheelchair that previously provided pressure relief.
