

## **Clinical Policy: Mirvetuximab soravatansine-gynx (Elahere)**

Reference Number: PA.CP.PHAR.617

Effective Date: 08/2023 Last Review Date: 07/2023

#### **Description**

Mirvetuximab soravtasnine-gynx (Elahere  $^{\text{TM}}$ ) is a folate receptor alpha (FR $\alpha$ )-directed antibody and microtubule inhibitor conjugate.

## FDA Approved Indication(s)

Elahere is indicated for the treatment of adult patients with a FR $\alpha$  positive, platinum-resistant epithelial ovarian, fallopian tube, or primary peritoneal cancer, who have received one to three prior systemic treatment regimens. Select patient for therapy based on an FDA-approved test.

This indication is approved under accelerated approval based on tumor response and durability of response. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial

#### Policy/Criteria

Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.

It is the policy of PA Health & Wellness® that Elahere is **medically necessary** when the following criteria are met:

## I. Initial Approval Criteria

- **A. Ovarian Cancer** (must meet all):
  - 1. Diagnosis of epithelial ovarian, fallopian tube, or primary peritoneal cancer;
  - 1. Prescribed by or in consultation with an oncologist;
  - 2. Age  $\geq$  18 years;
  - 3. Member meets all of the following parameters (a, b, and c) (see Appendix D):
    - a. FR $\alpha$  positive ovarian cancer determined by the Ventana FOLR1 (Folate Receptor 1/Folate Receptor Alpha) Assay;
    - b. Platinum resistant ovarian cancer;
    - c. Received at least 1 but no more than 3 prior systemic lines of anticancer therapy, including at least 1 line of therapy containing bevacizumab;
  - 4. Documentation of current actual body weight in kg and height in cm;
  - 5. Request meets one of the following (a or b):
    - a. Dose does not exceed 6mg/kg dosed based on adjusted ideal body weight (*see Appendix D*) on day 1 of every 3-week cycle;
    - b. Dose is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (*prescriber must submit supporting evidence*).

**Approval duration: 6 months** 

## **B.** Other diagnoses/indications

## **CLINICAL POLICY**

## Mirvetuximab soravatansine-gynx

1. Refer to the off-label use policy if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized): PA.CP.PMN.53

## **II.** Continued Therapy

## **A. Diagnosis** (must meet all):

- 1. Currently receiving medication via PA Health & Wellness benefit and documentation supports positive response to therapy or the Continuity of Care policy (PA.LTSS.PHAR.01) applies;
- 2. Member is responding positively to therapy.
- 3. Documentation of current actual body weight in kg;
- 4. If request is for a dose increase, request meets one of the following (a or b):\*
  - a. New dose does not exceed 6 mg/kg dosed based on adjusted ideal body weight (see Appendix D) on day 1 of every 3-week cycle;
  - b. New dose is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (*prescriber must submit supporting evidence*).

## **Approval duration: 12 months**

## **B. Other diagnoses/indications** (must meet 1 or 2):

1. Currently receiving medication via PA Health & Wellness benefit and documentation supports positive response to therapy or the Continuity of Care policy (PA.LTSS.PHAR.01) applies.

Approval duration: Duration of request or 12 months (whichever is less); or

2. Refer to the off-label use policy for the relevant line of business if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized): PA.CP.PMN.53

#### III. Diagnoses/Indications for which coverage is NOT authorized:

**A.** Non-FDA approved indications, which are not addressed in this policy, unless there is sufficient documentation of efficacy and safety according to the off label use policies – PA.CP.PMN.53

#### IV. Appendices/General Information

Appendix A: Abbreviation/Acronym Key FDA: Food and Drug Administration

FOLR1: Folate Receptor 1/Folate Receptor Alpha

Appendix B: Therapeutic Alternatives

Drug Name	<b>Dosing Regimen</b>	Dose Limit/ Maximum Dose
Ovarian Cancer		
Alimta® (pemetrexed)	Various	Varies
Alkeran® (melphalan)	Various	Varies
Avastin® (bevacizumab)	Various	Varies
carboplatin (Paraplatin®)	Various	Varies
cisplatin (Platinol-AQ®)	Various	Varies
cyclophosphamide (Cytoxan®)	Various	Varies

# CLINICAL POLICY Mirvetuximab soravatansine-gynx

Drug Name	<b>Dosing Regimen</b>	Dose Limit/
		<b>Maximum Dose</b>
docetaxel (Taxotere®)	Various	Varies
doxorubicin (Doxil®, Adriamycin®)	Various	Varies
etoposide (Vepesid®)	Various	Varies
gemcitabine (Gemzar®)	Various	Varies
ifosfamide (Ifex®)	Various	Varies
irinotecan (Camptosar®)	Various	Varies
oxaliplatin (Eloxatin®)	Various	Varies
topotecan (Hycamtin®)	Various	Varies
Hexalen® (altretamine)	Various	Varies

## Appendix C: Contraindications/Boxed Warnings

- Contraindication(s): none reported
- Boxed warning(s): ocular toxicity
  - o Elahere can cause severe ocular toxicities, including visual impairment, keratopathy, dry eye, photophobia, eye pain, and uveitis.
  - Conduct an ophthalmic exam including visual acuity and slit lamp exam prior to initiation of Elahere, every other cycle for the first 8 cycles, and as clinically indicated.
  - o Administer prophylactic artificial tears and ophthalmic topical steroids.
  - Withhold Elahere for ocular toxicities until improvement and resume at the same or reduced dose.
  - o Discontinue Elahere for Grade 4 ocular toxicities.

## Appendix D: General Information

- Platinum-resistant disease was defined as:
  - Members who have only had 1 line of platinum-based therapy must have received at least 4 cycles of platinum therapies, must have had a response (complete response/remission or partial response/remission) and then progressed between > 3 months and ≤ 6 months after the date of the last dose of platinum-based therapy.
  - o Members who have received 2 or 3 lines of platinum therapy must have progressed on or within 6 months after the date of the last dose of platinum-based therapy.
- Members must have received at least 1 but no more than 3 prior systemic lines of anticancer therapy. Examples include:
  - $\circ$  Adjuvant  $\pm$  neoadjuvant considered 1 line of therapy
  - Maintenance therapy (e.g., bevacizumab, poly adenosine diphosphate-ribose polymerase (PARP) inhibitors) will be considered part of the preceding line of therapy (i.e., not counted independently).
  - Therapy changed due to toxicity in the absence of progression will be considered part of the same line (i.e., not counted independently).
  - o Hormonal therapy will be counted as a separate line of therapy unless it was given as maintenance.
- The total dose of Elahere is calculated based on each patient's adjusted ideal body weight using the following formula:
  - $\circ$  AIBW = Ideal body weight (IBW [kg]) + 0.4\*(Actual body weight [kg] IBW)

## **CLINICAL POLICY**

## Mirvetuximab soravatansine-gynx

- $\circ$  Female IBW (kg) = 0.9\*height(cm) 92
- Information on FDA-approved tests for the measurement of FR $\alpha$  tumor expression is available at http://www.fda.gov/CompanionDiagnostics

V. Dosage and Administration

Indication	Dosing Regimen	<b>Maximum Dose</b>
Ovarian, fallopian tube, or	6mg/kg IV based on adjusted ideal	6mg/kg
primary peritoneal cancer	body weight (AIBW) on day 1 of	
	every 3-week cycle	

#### VI. Product Availability

Single-dose vials for injection: 100 mg/20 mL (5 mg/mL)
