Clinical Policy: Risedronate (Actonel, Atelvia)

Reference Number: PA.CP.PMN.100
Effective Date: 03.01.18
Last Review Date: 07.18

Description
Risedronate IR (Actonel®) and risedronate DR (Atelvia®) are oral bisphosphonates requiring prior authorization.

FDA Approved Indication(s)
Actonel is indicated:
- For the treatment and prevention of osteoporosis in postmenopausal women
- For the treatment and prevention of glucocorticoid-induced osteoporosis
- For the treatment to increase bone mass in men with osteoporosis
- For the treatment of Paget’s Disease (PD)

Atelvia is indicated for the treatment of osteoporosis in postmenopausal women.

Limitation of use: The optimal duration of use for bisphosphonates has not been determined. The safety and effectiveness of bisphosphonates for the treatment of osteoporosis are based on clinical data of one to four years duration. All patients on bisphosphonate therapy should have the need for continued therapy re-evaluated on a periodic basis. Patients at low-risk for fracture should be considered for drug discontinuation after 3 to 5 years of use. Patients who discontinue therapy should have their risk for fracture re-evaluated periodically.

Policy/Criteria
Provider must submit documentation (which may include office chart notes and lab results) supporting that member has met all approval criteria.

It is the policy of health plans affiliated with PA Health & Wellness that Actonel and Atelvia are medically necessary when the following criteria are met:

I. Initial Approval Criteria
   A. Osteoporosis (must meet all):
      1. Prescribed for the diagnosis or treatment of osteoporosis;
      2. Age ≥ 18 years;
      3. Failure of alendronate at up to maximum indicated doses, unless contraindicated or clinically significant adverse effects are experienced;
      4. Dose does not exceed:
         a. Actonel 30 mg/day (1 tablet/day), 35mg/week (1 tablet/week), or 150mg monthly (1 tablet/month);
         b. Atelvia 35 mg/week (1 tablet/week).
      Approval duration: 12 months

   B. Paget’s Disease (must meet all):
1. Diagnosis of Paget’s disease;
2. Request is for Actonel;
3. Age ≥ 18 years;
4. Failure of ≥ 6 month trial of alendronate at maximum indicated doses unless contraindicated or clinically significant adverse effects are experienced;
5. Current (within the last 30 days) lab shows elevated (outside the upper limit of normal) serum alkaline phosphatase;
6. Dose does not exceed 30 mg/day (1 tablet/day).

**Approval duration: 2 months**

C. **Other diagnoses/indications**

1. Refer to PA.CP.PMN.53.

II. **Continued Therapy**

A. **Osteoporosis** (must meet all):

1. Currently receiving medication via PA Health & Wellness benefit or member has met all initial approval criteria or the Continuity of Care Policy (PA.LTSS.PHAR.01) applies; Member is responding positively to therapy;
2. If request is for a dose increase, new dose does not exceed:
   a. Actonel 30 mg/day (1 tablet/day), 35mg/week (1 tablet/week), or 150mg monthly (1 tablet/month);
   b. Atelvia 35 mg/week (1 tablet/week).

**Approval duration: 12 months**

B. **Paget’s Disease** (must meet all):

1. Currently receiving medication via PA Health & Wellness benefit or member has met all initial approval criteria or the Continuity of Care Policy (PA.LTSS.PHAR.01) applies; Two months has elapsed since the completion of previous therapy with Actonel;
2. Current (within the last 30 days) lab shows elevated (outside the upper limit of normal) serum alkaline phosphatase;
3. If request is for a dose increase, new dose does not exceed 30 mg/day (1 tablet/day).

**Approval duration: 2 months**

C. **Other diagnoses/indications** (must meet 1 or 2):

- Currently receiving medication via PA Health & Wellness benefit or member has met all initial approval criteria or the Continuity of Care Policy (PA.LTSS.PHAR.01) applies; 
**Approval duration: Duration of request or 12 months (whichever is less);**
- or
1. Refer to PA.CP.PMN.53.

III. **Diagnoses/Indications for which coverage is NOT authorized**:

A. Non-FDA approved indications, which are not addressed in this policy, unless there is sufficient documentation of efficacy and safety according to the off label use policy – PA.CP.PMN.53 or evidence of coverage documents.
IV. Appendices/General Information

Appendix A: Abbreviation/Acronym Key

- DR: delayed-release
- FDA: Food and Drug Administration
- GIO: glucocorticoid-induced osteoporosis
- IR: immediate-release
- MO: male osteoporosis
- PD: Paget’s disease
- PMO: postmenopausal osteoporosis

Appendix B: Therapeutic Alternatives

This table provides a listing of preferred alternative therapy recommended in the approval criteria. The drugs listed here may not be a formulary agent for all relevant lines of business and may require prior authorization.

<table>
<thead>
<tr>
